Eco-Fashion Workshops for Schools

GUIDE

Hello, I'm Aurélie

Hello, I'm Aurélie, an eco-fashion workshop provider passionate about helping children explore creativity through sustainability. I design hands-on sessions where pupils learn to upcycle, repair and reimagine clothing in fun and accessible ways.

School Workshops

These workshops are aligned with STEAM learning and designed for Reception to KS2, combining creativity, design thinking, practical mending skills, and environmental awareness in an engaging, age-appropriate way.

Students don't just make something, they build **confidence, problem-solving skills,** and a **deeper understanding of how caring for clothes can reduce waste.**

School Workshops

Early Years Workshops (Reception and KS1)

These Early Years workshops are tailored for younger children, using short, interactive sessions designed to suit their developmental stage and concentration levels.

Activities encourage creativity, confidence, and fine motor skill development while introducing simple sewing and textile techniques through playful, hands-on learning.

Workshop Structure (Approx. 40 mins)

- Introduction to textiles and sewing using storytelling, demonstrations, and visual prompts
- Guided practical activity such as threading, fabric exploration, or beginner stitching
- Sensory, tactile, and age-appropriate learning activities
- Optional take-home creation for children to continue exploring at home

Group Size

Up to 20–24 children (depending on age and support staff)

Multiple sessions can be booked back-to-back for larger groups or full-day programs.

School Workshops

School Workshops (KS2)

Children are introduced to practical sewing and textile techniques while learning how materials can be repaired, reused, and redesigned instead of thrown away.

Sessions encourage creativity, experimentation, and independent thinking, while naturally supporting areas of the primary curriculum including Art & Design, DT, Maths & PSHE.

- Quiz - intro to textile sustainability
- Introduction to sewing (threading a needle, simple hand-stitching, sewing a button)
- Guided, hands-on stitching activity (finished project to take home)
- A “mending mission” card for each student

Group Size

Up to 20–24 children (depending on age and support staff)

Multiple sessions can be booked back-to-back for larger groups or full-day programs.

School Workshops

What Children Learn?

Upcycling techniques

Creative design skills

Basic sewing & repair

Sustainability awareness

Using old clothing and simple textile techniques, children learn **how fashion choices impact the environment** and **how creativity can help reduce waste**.

The sessions encourages **confidence, self-expression, and practical problem-solving** in a fun, supportive setting.

Book a workshop

Get in touch to request a quote or discuss how the workshop can be tailored to suit your group, curriculum, and timetable.
